### Course Overview

This course is suitable for anyone who wants to gain an in-depth understanding of Lean, including those who are new to the concept of Lean but who are ambitious about learning and applying the Lean principles and change management within their organization.

By the end of the course, you will be knowledgeable about Lean, its principles, processes and its practicability across different industries and sectors. You will also be able to identify how Lean can be related to your own Organization and you will be equipped with the knowledge to implement a successful Lean management project that will benefit and add value to your organization.

### Who Should Take This Course?

This course is ideal for professionals who:

- Want a good introduction to Lean methodology
- Need to know about Lean at work
- Would like to start a career in Lean Management

### What is Lean?

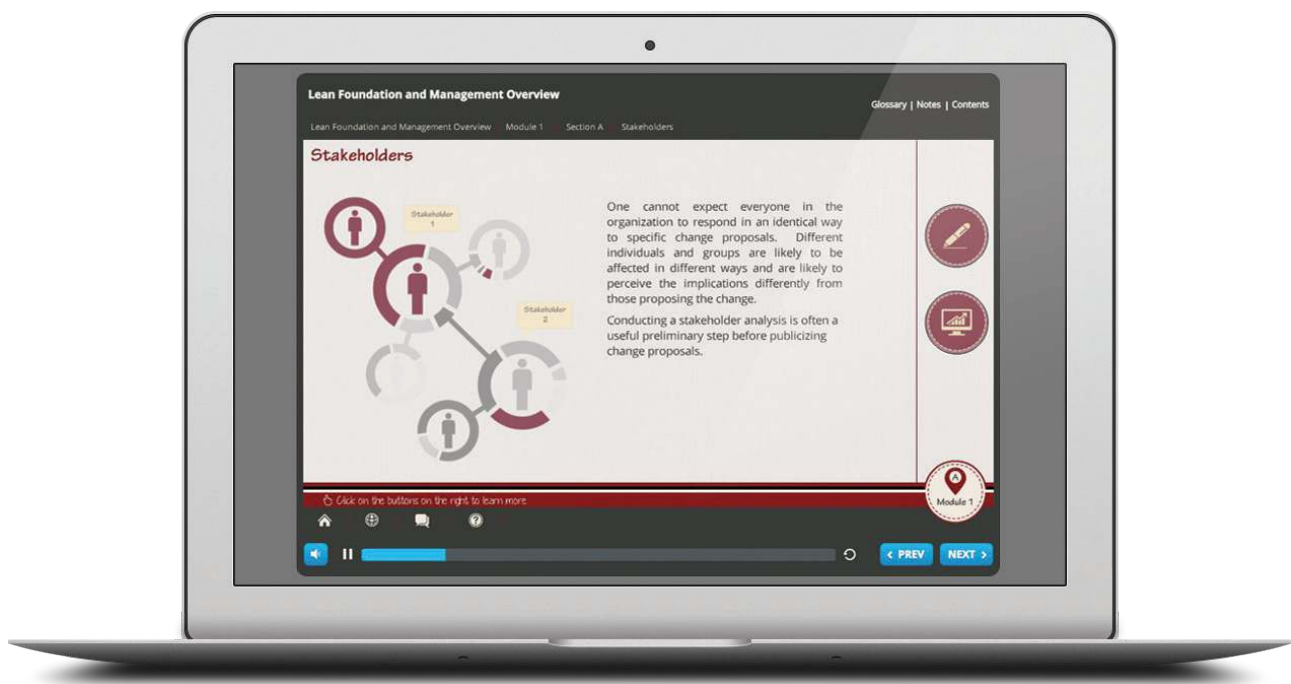

Lean's primary purpose is to reduce operational costs by eliminating waste and increasing customer satisfaction. Lean methodology focuses on continuous business improvement within an organization by encouraging Lean practitioners to motivate their workforce in order to achieve Lean goals.

### Benefits of Lean Training

After taking this course you will have developed the skills to solve problems using the Lean Six Sigma project structure. Lean can be applied to any organization and business process, so you will benefit from being able to apply Lean in your organization's industry sector.

### Assessment and Certification

The course is assessed by three multiple-choice tests and the completion of an interactive exercise, based on the learning outcomes from the core modules in the course. If successful, you will be awarded a Lean Foundation Certificate.
